

Sustainability Policy

Principles

Segway Nova Scotia is the first and largest Segway-authorized Dealer & Tour Operator in Nova Scotia. As a business whose products and services are based on clean, green, eco-friendly technology, we are in a position to grow our company in a sustainable and positive way. We realize that our business, as with all businesses, has an effect on the environment. Our goal is to minimize that impact wherever practical. Our commitment is to maintain environmental consciousness as a core value of our organization and to keep environmental sustainability as an important criterion in our business decisions.

Strategies and objectives

In the pursuit of environmental sustainability, Segway Nova Scotia will:

1. Ensure we meet and exceed all local, provincial and federal regulatory and legislative requirements.
2. Adequately provide the necessary resources to reach our targets, including staff training and creating an environment that encourages sustainability.
3. Establish and maintain an Environmental Committee to implement this policy.
4. Communicate openly about our policy to our customers and other stakeholders.
5. Pursue a waste management program ensuring waste produced is minimized, increasing the amount of recycled matter and reducing the amount of waste going to landfill.
6. Reduce energy and resource consumption.
7. Design energy and resource efficiency into new buildings and services.
8. Regularly review and set objectives and targets in accordance with this policy and make the necessary changes required for continual improvement.
9. Communicate the policy and these objectives to our employees, contractors, vendors, suppliers and the public in order to enhance the awareness of these groups to our commitment to responsible environmental management.

Responsibilities

Segway Nova Scotia management takes on the responsibility and challenge to establish and maintain a practical Environmental Management System. However, all staff have a responsibility to ensure they are aware how their activities relate to the objectives and targets of this policy and to support this commitment.
